EDUCATION

University of Science Bachelor Computer Science <i>GPA: 8.1/10</i>	HCM 2014 - 2018
--	--------------------

EXPERIENCE

Treehouse Finance <i>Software Engineer</i>	HCM 2022 - 2025
--	--------------------

- Collaborate daily with cross-functional teams of engineers and designers to align on project goals and deliverables.
- Proposed and implemented a new team workflow, improving development efficiency and collaboration.
- Enhanced the codebase quality by writing semantic and maintainable code, and adopting TypeScript.
- Contributed to the design and development of the UI Kit, ensuring consistency and scalability across the app.
- Conduct code reviews and actively share knowledge to support team growth and maintain high-quality standards.

Goldeneye Technology <i>Software Engineer</i>	HCM 2019 - 2021
---	--------------------

- Designed and implemented the UI/UX from scratch for a Production Planning System using Angular, significantly streamlining the client's daily operations.
- Revamped and modernized the UI of legacy Angular projects, enhancing usability, performance, and maintainability.

Employment Hero <i>Software Engineer</i>	HCM 2018 - 2019
--	--------------------

- Maintained and developed new features for the company's main website, ensuring performance, accessibility, and responsiveness.
- Implemented comprehensive test coverage and researched automation testing tools to improve code reliability and development workflows.
- Collaborated on infrastructure-related tasks for learning.

TMA Solutions <i>Intern</i>	HCM 2017
---------------------------------------	-------------

- Conducted research and development for a Fraud Detection System focused on identifying phishing emails using machine learning techniques.
- Built a working prototype achieving over 90% accuracy in detecting phishing emails, demonstrating strong potential for real-world application.

SKILLS

Design Sense	Clean, modern UI/UX that actually makes sense to users.
Problem Solving	I break things just to fix them better.
Languages I Speak (to computers):	Typescript, Python, Go, Lua.
Framework Toolbox:	HTML, CSS, ReactJS, Angular, Svelte, NextJS, NodeJS.

PROJECTS

Personal Blog <i>NextJS</i> A collection of notes, insights, and lessons from my learning journey in tech (and beyond).	My Blog
---	-------------------------

Vim colorscheme A dark neovim colorscheme written in Lua. Support built-in LSP and Treesitter	vn-night.nvim
